Target Role: Power BI & Power Platform Developer

Company: Eximietas Design

Subject: Power BI & Power Platform Developer - Kartik Bhatt

Dear Hiring Manager,

I am writing to express my strong interest in the Power BI & Power Platform Developer position at Eximietas Design. With over 3.5 years of hands-on experience spanning KPMG and GlobalLogic, I specialize in building end-to-end Microsoft Power Platform solutions, automating business workflows through Power Automate, designing interactive Power BI dashboards, and architecting Copilot/GenAI agents. My experience directly mirrors your requirement for scalable, high-performing enterprise applications.

During my tenure at KPMG, I spearheaded digital transformation and automation initiatives across 13 business sectors. I developed a complete Power Platform suite—integrating Power Apps, SharePoint Online, Power Automate, and Power BI—to automate reach outs across 30+ member firms, saving 1,200 hours annually. Additionally, I migrated legacy Excel frameworks across 45+ organizational pillars to structured SharePoint List solutions guarded by automated governance flows and deployed Copilot Studio agents, contributing to an overall operational savings of over 2,000 hours per year.

At GlobalLogic, working on high-priority engagements for client partners like Google, I designed quality assurance frameworks and process documentation that raised delivery quality from 74% to 95% while reducing data errors by 25%. My technical foundation in SQL, Python, VBA, and SharePoint governance enables me to deliver clean data pipelines, robust low-code architectures, and intuitive reporting solutions that empower business decision-making.

I am excited about the opportunity to bring my background in Power Platform development, process automation, and dashboard analytics to Eximietas Design. Thank you for your time and consideration. I welcome the chance to discuss how my technical expertise can support your client solutions and digital transformation goals.

Sincerely,

Kartik Bhatt
