Target Role: Business Analyst

Company: NetApp

Subject: Driving Operational Excellence & Scalable Solutions as Business Analyst

Dear Hiring Manager,

Dear Hiring Team, I am writing to express my strong interest in the Business Analyst role at NetApp. With ~3.5 years of experience bridging business needs and technology at KPMG and GlobalLogic, I specialize in process automation, business intelligence, requirement gathering, and workflow optimization. My background in developing enterprise Power Platform applications, SQL analytics, and GenAI automation makes me an ideal fit to drive operational efficiency at NetApp.

At KPMG, I acted as a vital strategic partner across 13 industry sectors, analyzing workflow bottlenecks and architecting automated systems that saved over 2,000 hours annually. I led the development of scalable Power Platform and SharePoint solutions servicing 20,000 annual reach outs across 30+ global member firms and managed data migrations across 45+ functional pillars. Furthermore, I spearheaded market share analysis for 6+ sectors and evaluated business requirements for over 100 RFP/RFI submissions.

During my tenure at GlobalLogic, I managed business process documentation across 10+ complex engagements, including high-stakes deliverables for Google. By designing robust quality assurance frameworks and leveraging data analytics to identify operational gaps, I elevated onshore project delivery quality from 74% to 95% and led 3 successful pilot projects that secured key client contracts against major MNC competition.

NetApp's dedication to data-driven innovation aligns perfectly with my passion for optimizing enterprise operations through analytical rigor and intelligent technology. I am excited about the opportunity to contribute my technical toolkit and cross-functional expertise to NetApp's team. Thank you for your time and consideration, and I look forward to discussing how my experience aligns with your strategic goals.

Sincerely,

Kartik Bhatt
