Target Role: Business Data Analyst

Company: NetApp

Application for Business Data Analyst - Kartik Bhatt

Dear Hiring Manager,

Dear Hiring Manager, I am writing to express my strong interest in the Business Data Analyst position at NetApp. With over 3.5 years of cross-functional experience delivering process automation, enterprise reporting, and advanced data analytics across KPMG and GlobalLogic, I specialize in transforming raw enterprise data into actionable insights and operational efficiencies.

At KPMG, I led key data migration and analytics initiatives, including building a Power Platform and Power BI solution that facilitated 20,000 annual reach-outs across 13 sectors while saving 1,200 hours per year. Additionally, I spearheaded the automation of legacy data collection processes across 45+ operational pillars and conducted Audit Market Share (AMS) analyses for senior leaders, ensuring data accuracy, integrity, and scalability across enterprise systems.

Prior to KPMG, my work at GlobalLogic focused on content engineering and data QA for major clients, including Google. I implemented data validation frameworks that cut error rates by 25% and boosted delivery quality metrics from 74% to 95%. My combined technical stack—spanning SQL, Power BI, Power Automate, SharePoint governance, and GenAI applications—enables me to solve complex business data challenges end-to-end.

NetApp's focus on data infrastructure and intelligent data management strongly aligns with my passion for data-driven transformation. I am eager to bring my analytical background, business intelligence expertise, and automation skillset to the Business Data Analyst team at NetApp. Thank you for your time and consideration, and I look forward to discussing how my experience aligns with your team's goals.

Sincerely,

Kartik Bhatt
