Target Role: Senior Customer Data Analyst

Company: Qlik

Application for Senior Customer Data Analyst - Kartik Bhatt

Dear Hiring Manager,

Dear Hiring Manager, I am writing to express my strong interest in the Senior Customer Data Analyst position at Qlik. With over 3.5 years of cross-functional experience at KPMG and GlobalLogic driving process automation, advanced analytics, and enterprise data solutions, I have consistently transformed complex data workflows into efficient, high-impact operational systems. I am excited about the opportunity to leverage my expertise in data analytics, automation, and platform integration to support Qlik's commitment to empowering data-driven organizations.

During my tenure as an Analyst at KPMG, I architected and deployed enterprise-grade Power Platform solutions, automated SPO workflows, and customized GenAI agents that streamlined data operations across 13 sectors. For instance, I created an automated data collection and reporting ecosystem covering 45+ organizational pillars, saving over 2,000 hours annually and enhancing data integrity across global teams. Furthermore, my hands-on experience conducting market share analyses and managing complex SharePoint governance aligns directly with the analytics and data architecture needs at Qlik.

Prior to KPMG, as an Associate Analyst at GlobalLogic, I focused on data quality, process optimization, and dataset engineering for key clients such as Google. By designing comprehensive QA workflows and process documentation across 10+ concurrent engagements, I reduced data entry error rates by 25% and raised project delivery quality from 74% to 95%. This background in enforcing data standards, optimizing datasets for AI models, and delivering actionable insights enables me to ensure high customer data accuracy and seamless reporting workflows.

I am eager to bring my combined skill set in SQL, Power BI, process automation, and stakeholder management to Qlik as a Senior Customer Data Analyst. I welcome the opportunity to discuss how my background in optimizing data lifecycle management and building intelligent automation solutions aligns with Qlik's operational goals. Thank you for your time and consideration, and I look forward to connecting soon.

Sincerely,

Kartik Bhatt
