Target Role: Business Analyst

Company: nan

Subject: Business Analyst - Kartik Bhatt | Process Automation & Data Analytics Specialist

Dear Hiring Manager,

I am writing to express my strong interest in the Business Analyst position. With over 3.5 years of experience bridging business requirements and technical execution at KPMG and GlobalLogic, I specialize in process automation, stakeholder collaboration, functional documentation, and data-driven decision making. I am eager to leverage my technical expertise and business acumen to drive measurable outcomes for your organization.

During my tenure at KPMG as an Analyst, I regularly led requirement-gathering workshops and analyzed legacy workflows across 13 business sectors. I translated complex operational challenges into automated Power Platform and GenAI solutions, successfully saving over 2,000 hours annually. Additionally, I conducted data analysis using MS Excel and SQL to validate business metrics, developed process governance frameworks across 45+ organizational pillars, and managed 100+ RFP/RFI proposals with multi-disciplinary stakeholders.

Prior to KPMG, as an Associate Analyst at GlobalLogic, I created process documentation, user guidelines, and robust QA workflows for high-stakes projects, including GenAI initiatives for clients such as Google. My structured approach to workflow analysis and quality control successfully boosted onshore project delivery quality from 74% to 95% and decreased data error rates by 25%.

My background in translating stakeholder needs into clear specifications, coupled with my certifications in Lean Six Sigma and AI fundamentals, equips me to immediately contribute to your Agile development cycles and process optimization initiatives. Thank you for your time and consideration; I look forward to discussing how my experience aligns with your team's goals.

Sincerely,

Kartik Bhatt
