Target Role: True Tandem - Power Platform Developer

Company: Truetandem

Subject: Driving Operational Excellence & Scalable Solutions as True Tandem - Power Platform Developer

Dear Hiring Manager,

I am writing to express my strong enthusiasm for the True Tandem - Power Platform Developer position at Truetandem. With over 3.5 years of cross-functional experience at KPMG and GlobalLogic, I specialize in designing high-impact Power Platform applications, driving process automation, and deploying AI-driven solution architectures. Truetandem's mission to deliver secure, user-centered application modernization for critical programs aligns perfectly with my background in transforming complex business needs into scalable digital solutions.

At KPMG, I spearheaded the architectural build of custom Power Apps and Power Automate workflows that streamlined enterprise operations across 13 sectors, saving over 2,000 hours annually. Among my key accomplishments was modernizing legacy Excel workflows into an automated SharePoint Online list infrastructure across 45+ pillars, protected by robust permission governance and automated alert flows. Additionally, I architected custom Copilot/GenAI agents and automated global asset repositories, proving my ability to combine low-code efficiency with modern AI capabilities within Agile team environments.

Prior to KPMG, my work as an Associate Analyst at GlobalLogic focused on content engineering and dataset optimization for Google's GenAI initiatives. I established QA protocols that elevated onshore project delivery quality from 74% to 95% and reduced data errors by 25%. This rigorous attention to quality control, documentation standards, and stakeholder collaboration ensures that every solution I deploy meets strict functional, security, and user-accessibility requirements.

By combining deep technical proficiency across Power Apps, Power Automate, SharePoint Online, and Dataverse concepts with Lean Six Sigma problem-solving, I am confident in my ability to immediately add value to Truetandem's solution delivery team. I welcome the opportunity to discuss how my automation mindset and technical skills will support your client missions. Thank you for your time and consideration, and I look forward to connecting soon.

Sincerely,

Kartik Bhatt
