Target Role: Business Analyst

Company: NetApp

Application for Business Analyst Position - Kartik Bhatt

Dear Hiring Manager,

Dear Hiring Manager, I am writing to express my strong interest in the Business Analyst position at NetApp. With over 3.5 years of experience across KPMG and GlobalLogic driving process automation, product/data analytics, and digital transformation, I specialize in translating complex business requirements into high-impact automated solutions and data-driven insights that optimize operational performance.

During my tenure at KPMG as a Knowledge Management Analyst, I led cross-functional automation and analytics initiatives that saved over 2,000 hours annually. Notably, I architected an enterprise Power Platform solution that facilitated 20,000 annual outreach interactions across 30+ member firms, saving 1,200 hours per year. I also evaluated 100+ RFP/RFI proposals, conducted Audit Market Share (AMS) analysis across 6+ sectors, and designed multi-modal Copilot agents to streamline data governance and unstructured data management.

Prior to KPMG, as an Associate Analyst at GlobalLogic working on high-priority Google client engagements, I established end-to-end QA frameworks and process documentation for GenAI training datasets. By instituting rigorous quality controls and data validation processes across 10+ projects, I helped boost onshore project delivery quality from 74% to 95% and successfully led 3 pilot programs against major MNC competitors.

NetApp's reputation for driving data management innovation aligns perfectly with my background in process optimization, advanced analytics, and stakeholder management. I am eager to leverage my technical acumen and problem-solving skills to help NetApp streamline operations and achieve strategic objectives. Thank you for your time and consideration, and I look forward to discussing how my experience can add value to your team.

Sincerely,

Kartik Bhatt
