Target Role: Supply Chain Data Analyst

Company: Nextpower

Subject: Application for Supply Chain Data Analyst - Kartik Bhatt

Dear Hiring Manager,

Dear Hiring Manager, I am writing to express my strong interest in the Supply Chain Data Analyst position at Nextpower. With over 3.5 years of experience delivering cross-functional data analytics, process automation, and business intelligence solutions at KPMG and GlobalLogic, I specialize in transforming complex data streams into automated, decision-ready workflows that drive operational excellence.

During my tenure at KPMG, I led major data migration and process automation initiatives, replacing legacy Excel workflows across 45+ business pillars with automated SharePoint and Power Automate integrations. By architecting scalable Power Platform solutions (Power BI, Power Apps, Power Automate) and multi-modal Copilot agents, I streamlined cross-sector reporting and generated over 2,000 hours in annual operational savings. Furthermore, my proficiency in SQL, Excel/VBA macro automation, and market analysis allows me to build robust data pipelines and interactive dashboards that optimize operational productivity.

At GlobalLogic, my focus centered on content engineering, data quality assurance, and workflow standardization for high-visibility client initiatives, including projects for Google. I established rigorous QA protocols that reduced data entry errors by 25% and boosted onshore project delivery quality from 74% to 95%. My background in data auditing, root-cause analysis, and cross-functional stakeholder management equips me to ensure high data integrity across supply chain operations.

I am eager to leverage my background in automated reporting, data governance, and process optimization to support Nextpower's supply chain analytics goals. Thank you for your time and consideration. I welcome the opportunity to discuss how my technical skills and analytical mindset can add value to your team.

Sincerely,

Kartik Bhatt
