Target Role: Data Analyst

Company: Scoutit

Subject: Driving Operational Excellence & Scalable Analytics as Data Analyst

Dear Hiring Manager,

I am writing to express my strong interest in the Data Analyst position at Scoutit. With over 3.5 years of experience driving process automation, advanced reporting, and data governance at KPMG and GlobalLogic, I specialize in transforming complex data workflows into efficient, high-impact business solutions.

During my tenure at KPMG, I architected integrated data solutions using Power BI, SQL, and Power Platform, saving over 2,000 hours annually across 13 business sectors. My work involved migrating legacy data frameworks to automated SharePoint list architectures for 45+ pillars, executing Audit Market Share analysis across 6+ sectors, and building multi-modal Copilot agents to automate data tagging and metadata governance.

At GlobalLogic Technologies, I led content engineering and data QA initiatives for tier-one clients like Google. By implementing structured data verification protocols, I reduced entry error rates by 25% and improved onshore delivery quality from 74% to 95% across multi-level dataset projects.

I am excited about the opportunity to bring my analytical rigor, automation background, and commitment to operational excellence to Scoutit. Thank you for your time and consideration; I look forward to discussing how my experience aligns with your team's goals.

Sincerely,

Kartik Bhatt
