Target Role: Data Analyst

Company: Ultimutt™

Application for Data Analyst Position - Kartik Bhatt

Dear Hiring Manager,

Dear Hiring Manager, I am writing to express my strong interest in the Data Analyst position at Ultimutt™. With over 3.5 years of experience bridging analytics, automation, and business intelligence at KPMG and GlobalLogic, I specialize in transforming raw datasets into actionable insights, driving process efficiency, and building scalable reporting infrastructure.

During my tenure as an Analyst at KPMG, I engineered end-to-end analytics and automation pipelines using SQL, Power BI, Power Apps, and Power Automate. Notably, I led the migration of legacy data collection processes across 45+ operational pillars into automated workflows, conducted Audit Market Share (AMS) analyses across 6+ sectors, and created intelligent agents that saved over 2,000 hours annually while keeping executive stakeholders informed.

Prior to KPMG, at GlobalLogic, I focused on data quality engineering and process optimization for high-stakes client initiatives, including datasets for Google. I established rigorous QA protocols that slashed data entry errors by 25% and improved project delivery quality from 74% to 95%, demonstrating my commitment to absolute data precision and operational rigor.

I am eager to bring my analytical background, business intelligence acumen, and passion for continuous improvement to Ultimutt™. I welcome the opportunity to discuss how my technical skills in data analytics and workflow automation can add immediate value to your team. Thank you for your time and consideration.

Sincerely,

Kartik Bhatt
