Target Role: Supply Chain Data Analyst

Company: Nextpower

Application for Supply Chain Data Analyst - Kartik Bhatt

Dear Hiring Manager,

Dear Hiring Manager at Nextpower, I am writing to express my strong interest in the Supply Chain Data Analyst position. With over 3.5 years of experience specializing in data analytics, process automation, business intelligence, and digital transformation across KPMG and GlobalLogic, I offer a proven capability in turning raw data into structured insights and automated workflows.

At KPMG, I led cross-functional analytics and automation initiatives across 13 business sectors. I designed end-to-end Power Platform solutions (Power BI, Power Automate, Power Apps) and migrated legacy Excel processes across 45+ operational pillars to automated SPO lists. These data optimization efforts eliminated over 2,000 manual hours annually, significantly enhanced data integrity, and empowered leadership with real-time operational visibility.

Prior to KPMG, my work at GlobalLogic focused on content engineering and data QA for major clients, including Google. By establishing rigorous data validation protocols and standardizing operational documentation across 10+ projects, I reduced data errors by 25% and lifted delivery quality from 74% to 95%. This background instills in me the discipline required to maintain data fidelity and improve supply chain metrics under tight operational deadlines.

I am eager to bring my expertise in Power BI dashboarding, SQL analysis, and workflow automation to Nextpower to help optimize your supply chain processes and data performance. Thank you for your time and consideration, and I look forward to discussing how my experience can contribute to Nextpower's operational goals.

Sincerely,

Kartik Bhatt
