Target Role: Power Apps Developer (Power Platform + Power BI)

Company: PeopleScout

Subject: Driving Operational Excellence & Scalable Solutions as Power Apps Developer (Power Platform + Power BI)

Dear Hiring Manager,

Dear Hiring Manager, I am writing to express my strong interest in the Power Apps Developer (Power Platform + Power BI) position at PeopleScout. With over 3.5 years of hands-on experience architecting automated low-code applications, complex Power Automate workflows, and interactive Power BI dashboards, I specialize in transforming legacy business operations into streamlined digital systems. My technical foundation across the Microsoft Power Platform, paired with my track record of driving process efficiency at KPMG, aligns directly with PeopleScout's goals for digital transformation.

During my tenure as an Analyst at KPMG, I designed and deployed complete Power Platform solutions that automated cross-functional processes across 30+ global member firms and 13 industry sectors. Notably, I developed an integrated system utilizing Power Apps, SharePoint Online, and Power Automate that facilitated 20,000 annual reach outs and generated 1,200 hours of savings each year. Additionally, I spearheaded the migration of 45+ legacy Excel tracking systems to automated SharePoint Online lists managed by custom flows, and architected Copilot/GenAI agents to automate metadata tagging and data cleanup, yielding a total savings of over 2,000 hours annually.

Prior to KPMG, at GlobalLogic Technologies, I led content engineering and data QA initiatives for high-profile client engagements, including Google GenAI training datasets. By designing robust quality control processes and standardization documentation across 10+ projects, I helped boost delivery quality from 74% to 95% while overseeing weekly audits of 500+ assets. This background reinforced my ability to manage complex data structures, enforce governance standards, and partner effectively with technical and non-technical stakeholders alike.

I am eager to bring my expertise in Power Apps development, Power BI visualization, and workflow automation to PeopleScout to build intuitive, high-impact enterprise applications. Thank you for your time and consideration. I welcome the opportunity to discuss how my background and technical skills can contribute to your team's upcoming initiatives.

Sincerely,

Kartik Bhatt
