Target Role: Business Analyst

Company: Deloitte

Subject: Application for Business Analyst - Kartik Bhatt

Dear Hiring Manager,

Dear Hiring Manager, I am writing to express my strong enthusiasm for the Business Analyst position at Deloitte. With over 3.5 years of experience driving process automation, requirement analysis, and digital transformation initiatives across KPMG and GlobalLogic, I have consistently bridged the gap between complex business requirements and technical execution. My background in delivering scalable enterprise solutions through Power Platform, SQL, and GenAI workflows equips me to immediately contribute to Deloitte's client delivery excellence.

At KPMG, I operated as a key driver of process optimization and business analytics across 13 diverse sectors. I architected enterprise Power Platform applications facilitating 20,000 reach-outs annually and automated cross-pillar data pipelines across 45+ operational verticals, generating over 2,000 hours in annual efficiency savings. Furthermore, I managed 100+ RFP/RFI responses and conducted sector-wide Market Share analyses, sharpening the exact business strategy and analytical rigor expected of a Business Analyst at Deloitte.

During my tenure as an Associate Analyst at GlobalLogic, I focused on content engineering and dataset optimization for premier engagements including Google. I established robust QA frameworks that reduced data errors by 25% and raised delivery quality from 74% to 95%, while successfully securing 3 pilot projects against major global competitors. This experience reinforced my proficiency in translating vague functional requests into structured, high-performing operational processes.

I am eager to leverage my background in process optimization, advanced analytics, and executive stakeholder collaboration to add immediate value to Deloitte's teams. Thank you for your time and consideration, and I welcome the opportunity to discuss my qualifications further.

Sincerely,

Kartik Bhatt
