Target Role: Senior Fixed Income Integration Business Analyst

Company: Luxoft

Application for Senior Fixed Income Integration Business Analyst - Kartik Bhatt

Dear Hiring Manager,

I am writing to express my strong interest in the Senior Fixed Income Integration Business Analyst position at Luxoft, supporting your leading Australian financial institute client. With over 3.5 years of experience in business analysis, workflow automation, enterprise data integration, and cross-functional stakeholder management across KPMG and GlobalLogic, I specialize in bridging complex business requirements with technical execution to optimize data and operational workflows.

At KPMG, I served as a key Analyst leading automation and data architecture initiatives across 13 sectors. I successfully engineered end-to-end integration solutions using Power Platform and automated data pipelines, migrating legacy data frameworks across 45+ operational pillars and saving over 2,000 hours annually. My background in facilitating multi-stakeholder workshops, conducting gap analysis, managing change governance, and enforcing permission governance directly prepares me to support complex integration workstreams, data mapping, and exception handling for your client's platforms.

During my tenure at GlobalLogic, I focused on rigorous QA process design, data validation, and documentation standards for major tech client initiatives, including Google. I routinely audited hundreds of data assets weekly, designed testing frameworks that boosted delivery quality from 74% to 95%, and piloted multi-level data extraction projects. This disciplined approach to data accuracy, system validation, and requirements documentation aligns directly with the precision required for managing static reference data, interface feeds, and downstream messaging validation.

I am eager to bring my expertise in business process analysis, system integration, and digital transformation to Luxoft's team. I look forward to discussing how my experience in driving technical alignment, optimizing data flows, and delivering scalable solutions can contribute to the success of your Australian financial services client. Thank you for your time and consideration.

Sincerely,

Kartik Bhatt
