Target Role: Power BI developer

Company: Antal International

Subject: Power BI Developer Application - Kartik Bhatt

Dear Hiring Manager,

Dear Hiring Team at Antal International,

I am writing to express my strong interest in the Power BI Developer position at Antal International. With over 3.5 years of cross-functional experience across KPMG and GlobalLogic, I specialize in transforming complex data environments into actionable visual insights using Power BI, Power Platform, and SQL. My background in building enterprise-scale dashboards and automated data pipelines directly aligns with your need for strong analytics expertise.

During my tenure as an Analyst at KPMG, I architected integrated solutions using Power BI, Power Apps, Power Automate, and SharePoint that served 30+ member firms across 13 sectors and saved over 1,200 hours annually. I also replaced legacy Excel tracking systems across 45+ organizational pillars with automated SharePoint and Power Automate workflows, significantly streamlining reporting pipelines and metadata governance while securing multiple awards for automation excellence.

Prior to KPMG, as an Associate Analyst at GlobalLogic, I established data quality control frameworks and managed process documentation across 10+ engagements for high-profile clients like Google, driving delivery quality scores from 74% to 95%. This blend of rigorous QA, data modeling, and process automation enables me to quickly translate business requirements into clean, accurate, and scalable Power BI dashboards.

I am excited about the opportunity to contribute my technical acumen in Power BI, data engineering, and automation to Antal International's client solutions. Thank you for your time and consideration, and I look forward to discussing how my experience can add immediate value to your team.

Sincerely,

Kartik Bhatt
