Target Role: Business Analyst

Company: HYrEzy Tech Solutions

Application for Business Analyst Position - Kartik Bhatt

Dear Hiring Manager,

I am writing to express my strong interest in the Business Analyst position at HYrEzy Tech Solutions. With over 3.5 years of experience delivering process automation, data analytics, and workflow optimization solutions across KPMG and GlobalLogic, I specialize in translating complex business requirements into high-impact digital solutions that streamline operations and drive strategic value.

During my tenure at KPMG as an Analyst, I led cross-functional initiatives spanning 13 sectors. Notably, I architected an enterprise Power Platform framework that automated 20,000 annual stakeholder reach-outs, saving 1,200 operational hours per year. I also facilitated the migration of legacy data collection processes across 45+ business pillars into automated SharePoint Online list architectures with custom Power Automate workflows, saving over 2,000 cumulative hours annually while ensuring robust governance and data accuracy.

Prior to KPMG, my role as an Associate Analyst at GlobalLogic involved collaborating on key content engineering projects for top-tier clients including Google. I created comprehensive process documentation for 10+ engagements, established QA frameworks that decreased error rates by 25%, and improved project delivery quality from 74% to 95%. This hands-on background in requirements gathering, process mapping, and quality assurance equips me to effectively analyze business needs at HYrEzy Tech Solutions.

I am eager to bring my expertise in Business Analysis, Power Platform, SQL, and process optimization to HYrEzy Tech Solutions to help drive measurable efficiency and deliver scalable business outcomes. Thank you for your time and consideration; I look forward to discussing how my experience aligns with your team's goals.

Sincerely,

Kartik Bhatt
