Target Role: Product Analyst

Company: SourcingXPress

Application for Product Analyst - Kartik Bhatt

Dear Hiring Manager,

Dear Hiring Manager, I am writing to express my enthusiastic interest in the Product Analyst position at SourcingXPress. With over 3.5 years of experience driving process automation, data analytics, and GenAI workflows at KPMG and GlobalLogic, I have built a track record of transforming complex operational data into actionable product and process improvements.

At KPMG, I served as an Analyst leading cross-functional projects across 13 sectors. I architected end-to-end solutions using Power Platform, Power BI, and Copilot Studio—including a enterprise workflow that streamlined 20,000 annual reach-outs for 30+ member firms and saved 1,200 hours per year. My efforts in migrating legacy Excel pipelines to automated SharePoint systems and building GenAI agents yielded over 2,000 hours in annual operational savings while supporting 100+ RFP/RFI engagements.

Prior to KPMG, as an Associate Analyst at GlobalLogic, I delivered data engineering and quality assurance solutions for premier clients including Google. I established QA frameworks that reduced data entry errors by 25% and escalated project delivery quality from 74% to 95% across 10+ key initiatives. My experience conducting market share analysis, governing data architectures, and managing multi-stakeholder feedback directly aligns with the analytical rigor required for the Product Analyst role at SourcingXPress.

I am eager to leverage my background in product analytics, automation, and cross-functional execution to deliver scalable solutions at SourcingXPress. Thank you for your time and consideration, and I look forward to discussing how my experience fits your team's upcoming goals.

Sincerely,

Kartik Bhatt
