Target Role: Power BI Developer Profile

Company: emagine

Application for Power BI Developer Profile - Kartik Bhatt

Dear Hiring Manager,

I am writing to express my strong interest in the Power BI Developer Profile position at emagine. With over 3.5 years of experience developing enterprise data visualization tools, automated workflows, and Power Platform solutions at KPMG and GlobalLogic, I specialize in converting raw complex datasets into clear, actionable business intelligence dashboards.

At KPMG, I spearheaded the architectural design and deployment of business intelligence and automation solutions across 13 sectors. Notably, I developed an end-to-end Power Platform solution leveraging Power BI, Power Apps, and Power Automate that automated reporting and communication across 30+ member firms, saving 1,200 hours annually. Furthermore, I directed the migration of legacy Excel collection workflows across 45+ pillars into structured SharePoint Online lists with automated governance, demonstrating my ability to build secure, scalable data models.

During my tenure at GlobalLogic Technologies, I managed content engineering and data QA workflows for tier-1 clients such as Google. I designed robust data validation protocols that reduced errors by 25% and boosted delivery quality from 74% to 95%. Backed by certifications in Azure AI Fundamentals and Lean Six Sigma, I bring a methodical approach to data modeling, ETL, dashboard development, and process optimization that aligns directly with emagine's standards.

I am excited about the opportunity to bring my background in Power BI, data engineering, and operational automation to emagine. Thank you for your time and consideration, and I look forward to discussing how my technical skill set can add immediate value to your analytics initiatives.

Sincerely,

Kartik Bhatt
