Target Role: Business Analyst

Company: NetApp

Application for Business Analyst Position - Kartik Bhatt

Dear Hiring Manager,

Dear Hiring Manager,

I am writing to express my strong interest in the Business Analyst position at NetApp. With over 3.5 years of cross-functional experience across KPMG and GlobalLogic, I specialize in translating complex operational requirements into scalable digital solutions, leveraging process automation, enterprise analytics, and low-code/AI platforms to drive business performance.

At KPMG, I served as a key driver for process optimization and digital transformation across 13 business sectors. I designed and deployed an end-to-end Power Platform ecosystem that facilitated 20,000 annual reach outs across 30+ member firms, saving 1,200 hours per year. Furthermore, I modernized legacy data tracking for 45+ organizational pillars by creating automated SharePoint integrations and Copilot agents, generating over 2,000 hours of aggregate operational savings while administering system governance for over 10,000 members.

Prior to KPMG, my work at GlobalLogic involved optimizing content engineering and AI dataset building for key global clients, including Google. I established rigorous QA frameworks and process documentation across 10+ major engagements, elevating onshore delivery quality from 74% to 95% and reducing data entry errors by 25%. My ability to bridge business requirements with technical execution positions me to deliver immediate value to NetApp's strategic initiatives.

I am excited about the opportunity to bring my analytical capabilities, stakeholder management experience, and automation skill set to NetApp as a Business Analyst. Thank you for your time and consideration, and I look forward to discussing how my background aligns with your team's goals.

Sincerely,

Kartik Bhatt
