Target Role: Data Analyst

Company: Scoutit

Application for Data Analyst Position - Kartik Bhatt

Dear Hiring Manager,

Dear Hiring Manager at Scoutit, I am writing to express my strong interest in the Data Analyst position at Scoutit. With over 3.5 years of cross-functional experience across KPMG and GlobalLogic, I specialize in transforming raw data repositories into actionable business intelligence, automating complex workflows, and deploying scalable analytics tools. My technical background spanning SQL, Power BI, Power Platform, and custom GenAI agents positions me to deliver immediate value to Scoutit's analytical initiatives.

During my tenure as an Analyst at KPMG, I architected integrated Power Platform data solutions and automated pipeline integrations for 45+ pillars, facilitating 20,000 annual reach-outs and saving over 1,200 hours per year. I also conducted Audit Market Share (AMS) data analysis across 6+ sectors and managed data governance for thousands of global assets. My contributions yielded over 2,000 hours in annual operational savings and earned me multiple performance recognitions, including KUDOS for Lean Six Sigma efficiency.

Prior to KPMG, as an Associate Analyst at GlobalLogic working on high-visibility Google projects, I designed data quality assurance frameworks that reduced data entry errors by 25% and raised onshore project delivery quality from 74% to 95%. Managing technical documentation and evaluating multi-level datasets strengthened my ability to enforce data accuracy standards under tight deadlines, a skill set directly applicable to the Data Analyst role at Scoutit.

I am eager to bring my analytical rigor, automation expertise, and data governance background to Scoutit. Thank you for your time and consideration. I welcome the opportunity to discuss how my technical qualifications and problem-solving background align with Scoutit's growth goals.

Sincerely,

Kartik Bhatt
