Target Role: Data Analyst

Company: Ultimutt™

Subject: Driving Data-Driven Insights and Process Automation as Data Analyst

Dear Hiring Manager,

Dear Hiring Manager, I am writing to express my strong interest in the Data Analyst position at Ultimutt™. With over 3.5 years of professional experience across KPMG and GlobalLogic, I specialize in transforming raw enterprise data into actionable insights through Power BI dashboarding, automated SQL/VBA reporting, process optimization, and AI-driven data management solutions.

During my tenure at KPMG as a Knowledge Management Analyst, I led data architecture and automation projects across 13 distinct business sectors. Notably, I developed a comprehensive Power Platform and Power BI solution serving 30+ global member firms that saved 1,200 operational hours per year, and migrated fragmented Excel data across 45+ operational pillars into structured, automated SharePoint data flows. Additionally, my analytical work on Audit Market Share (AMS) reports and data repository cleansing (handling 30,000+ assets) enabled executive teams to make precise, metric-backed decisions.

At GlobalLogic, working on high-priority client engagements including Google data initiatives, I established rigorous quality assurance frameworks that reduced data input errors by 25% and raised delivery quality metrics from 74% to 95%. My background in structuring training datasets and automating data pipelines ensures I can immediately maintain data hygiene, streamline reporting workflows, and deliver strategic clarity to cross-functional partners.

I am eager to leverage my analytical expertise, SQL/Excel automation, and data governance capabilities to solve complex data challenges at Ultimutt™. Thank you for your time and consideration; I look forward to discussing how my experience aligns with your team's upcoming goals.

Sincerely,

Kartik Bhatt
