Target Role: Senior Power Apps Developer (Power Platform + Power BI)

Company: Luxoft

Subject: Senior Power Apps Developer (Power Platform + Power BI) - Kartik Bhatt

Dear Hiring Manager,

I am writing to express my enthusiastic interest in the Senior Power Apps Developer (Power Platform + Power BI) position at Luxoft. With over 3.5 years of cross-functional experience delivering enterprise process automation, custom Power Apps applications, automated Power Automate workflows, and business intelligence dashboards across KPMG and GlobalLogic, I am confident in my ability to drive scalable low-code solution delivery for your clients.

During my tenure at KPMG, I spearheaded the deployment of an end-to-end Power Platform solution integrating Power Apps, SharePoint Online, Power Automate, and Power BI across 30+ member firms in 13 sectors. This initiative facilitated 20,000 annual reach outs and reclaimed 1,200 hours annually. Furthermore, I migrated legacy Excel tracking across 45+ organizational pillars to an automated SharePoint List framework governed by 3 custom Power Automate flows. Combined with my work building multi-modal Copilot agents, my automated solution designs generated over 2,000 hours of annual efficiency savings across business units.

In addition to my low-code platform expertise, my background as an Associate Analyst at GlobalLogic focused on content engineering and rigorous quality assurance, including building dataset pipelines for Google's GenAI features on Android. I established comprehensive process documentation across 10+ engagements, driving onshore project delivery quality from 74% to 95% while overseeing weekly QA for 500+ complex artifacts.

Luxoft's reputation for engineering excellence and digital transformation aligns perfectly with my skills in Power Platform development, business intelligence, and GenAI integrations. Holding certifications in Microsoft Azure AI and Lean Six Sigma, I am eager to apply my technical and domain experience to help Luxoft's clients automate operations and unlock data insights. Thank you for your time and consideration, and I look forward to discussing how my qualifications match your team's goals.

Sincerely,

Kartik Bhatt
