Target Role: Technical Product Analyst

Company: Vensure Employer Solutions

Application for Technical Product Analyst - Kartik Bhatt

Dear Hiring Manager,

Dear Hiring Manager, I am writing to express my strong enthusiasm for the Technical Product Analyst role at Vensure Employer Solutions. With over 3.5 years of experience driving cross-functional automation, low-code product building, and GenAI integrations across KPMG and GlobalLogic, I specialize in translating complex business requirements into high-impact technical solutions. I am eager to bring my technical analysis expertise to Vensure Employer Solutions to streamline operations and enhance digital workflows.

At KPMG, I operated at the intersection of technical analysis and product development. I engineered an enterprise Power Platform solution spanning 30+ member firms and 13 sectors that automated 20,000 annual reach-outs and saved 1,200 hours per year. Additionally, I architected automated SharePoint List integrations for 45+ data pillars using Power Automate flows and built a custom Copilot Studio agent that cut manual data processing by 325 hours. My total automation initiatives saved over 2,000 hours annually while handling 100+ RFP/RFI technical evaluations.

During my tenure at GlobalLogic supporting Google client initiatives, I managed technical process documentation across 10+ projects and established QA frameworks that increased onshore delivery quality from 74% to 95%. I successfully piloted AI training dataset curation projects and implemented data validation processes that cut errors by 25%, demonstrating my ability to analyze product requirements and deliver reliable data solutions.

I am excited to bring my technical toolkit—spanning Power Platform, SQL, GenAI agents, and data analytics—alongside my background in stakeholder management to Vensure Employer Solutions. I welcome the opportunity to discuss how my hands-on experience in process automation and technical solution design can support Vensure Employer Solutions' strategic goals. Thank you for your time and consideration.

Sincerely,

Kartik Bhatt
