Target Role: Business analyst - Regulatory reporting

Company: Infosys

Application for Business analyst - Regulatory reporting position at Infosys

Dear Hiring Manager,

Dear Hiring Manager, I am writing to express my strong interest in the Business analyst - Regulatory reporting position at Infosys. With over 3.5 years of cross-functional experience driving business analysis, process automation, and data governance at KPMG and GlobalLogic, I have built a career around transforming complex operational and regulatory workflows into seamless, automated reporting systems. I am eager to bring my expertise in Power Platform, SQL, Power BI, and data quality assurance to Infosys's dynamic consulting and technology environment.

During my tenure at KPMG as a Knowledge Management Analyst, I spearheaded enterprise-wide automation and data governance initiatives across 13 sectors. Notably, I developed a full-stack Power Platform and Power BI solution supporting 20,000 interactions annually across 30+ member firms, saving 1,200 hours per year while enhancing data accuracy. I also led Audit Market Share (AMS) analyses for 6+ sectors and designed automated SharePoint and Power Automate governance workflows that streamlined regulatory compliance, change management, and reporting for over 45 operational pillars.

Prior to KPMG, my work at GlobalLogic involved establishing standard operating procedures, QA processes, and compliance documentation for high-stakes Google AI projects. By introducing structured data validation protocols, I reduced data errors by 25% and elevated delivery quality metrics from 74% to 95%. This blend of analytical rigor, data quality enforcement, and technical agility positions me to quickly digest complex regulatory frameworks and deliver high-impact reporting tools for Infosys and its global clients.

Infosys's reputation for driving digital transformation and compliance excellence aligns perfectly with my background in automating critical reporting pipelines and governing enterprise data assets. I am confident that my technical skills in SQL, Power BI, Copilot/GenAI automation, and stakeholder management will enable me to make immediate contributions to your regulatory reporting team. Thank you for your time and consideration; I welcome the opportunity to discuss how my experience fits your team's goals.

Sincerely,

Kartik Bhatt
