**Target Role:** Product Operations & Analytics Intern

**Company:** Sarvam

**Subject: Driving Operational Excellence & Scalable Solutions as Product Operations & Analytics Intern**

Dear Hiring Manager,

Dear Hiring Team at Sarvam, I am writing to express my strong enthusiasm for the Product Operations & Analytics Intern position at Sarvam. With approximately 3.5 years of experience across KPMG and GlobalLogic leading process automation, data analytics, and GenAI solution deployment, I have consistently turned complex operational challenges into streamlined, scalable product workflows. Sarvam's pioneering work in building sovereign GenAI systems deeply resonates with my passion for leveraging AI, SQL, Power BI, and workflow automation to drive product excellence.

During my tenure as an Analyst at KPMG, I spearheaded cross-functional automation and analytics initiatives that saved over 2,000 hours annually. I architected multi-modal Copilot agents for automated metadata tagging and data cleanup, built low-code applications impacting 20,000 annual stakeholder touchpoints, and delivered sector-wide Audit Market Share (AMS) analytics. Furthermore, I managed large-scale platform governance and change management across 45+ organizational pillars, ensuring operational reliability and high data fidelity.

Prior to KPMG, at GlobalLogic, I focused on content engineering and data operations for client projects including Google's GenAI screen search datasets. I established rigorous QA frameworks and process documentation that reduced data error rates by 25% and increased onshore delivery quality from 74% to 95%. Managing weekly QA streams of 500+ data pieces and successfully winning 3 pilot engagements against major MNC competitors strengthened my ability to lead product operations with speed, accuracy, and customer-centric rigor.

Joining Sarvam as a Product Operations & Analytics Intern presents an exciting opportunity to apply my combined skill set in GenAI agents, product analytics, and operational strategy to help scale your cutting-edge platform. I am eager to bring my analytical rigor, technical adaptability, and bias for action to your team. Thank you for your time and consideration, and I look forward to discussing how my background aligns with Sarvam's goals.

Sincerely,

**Kartik Bhatt**
